

UPDATE ON THE CRESSON BYPASS

The contractor will be paving the median within the next couple of weeks, but traffic will not be placed there until later. TxDOT and the contractor are working to efficiently manage the time needed for the detour to minimize the inconvenience it creates.

Traffic will be in the median detour for several months. The median will be used during 2 main phases of the project. First Southbound US 377 traffic will be placed there while the contractor makes the new connections to the Relief Route. Then Southbound traffic will be placed on the new US 377 main lanes and Northbound traffic will be placed on the detour while construction changes are made to the Northbound business route entering town.

**PLEASE SLOW DOWN DRIVING THRU THE
CONSTRUCTION ZONE!!!**
